A minute lost in the oil game has lost many a man a million

Personnel:

The Dixie Queen Oil and Investment Company is backed and controlled by conservative, experienced and thoroughly responsible business people of recognized ability, which insures the affairs of the company will be conducted in a business-like manner.

Our President, Mr. A. P. Herron, of Oakland, Miss., has been cashier of the Bank of Oakland for a number of years, and is a man of unquestioned character, integrity and ability.

Mr. E. L. Marders, Vice-President, an Oakland, Miss., merchant and planter, is a most capable executive, conservative and successful business man.

Mrs. Cyrene S. Drennan, Secretary and Treasurer of the company, of Charleston, Miss., has been actively interested in oil operations for some time, and her experience makes her a most valuable active participant in the handling and development of the company's holdings, and insures an efficient administration of the company's affairs.

Mr. G. M. Thaxton, of Wichita Falls, Texas, has been most successful in the oil business in Texas since the field was opened and is recognized as a man of highest character and business ability.

Mr. W. T. Knight, of Wichita Falls, Texas, who is also connected with the company, is an honorable and progressive citizen and oil operator who will co-operate with the company in making The Dixie Queen Oil and Investment Company one of the best producers in Texas.

We do not claim to have the best proposition on earth, but we bought some of the highest priced acreage in the world-wonder field of Burkburnett, Texas, and have drilling sites sufficient that with honest and efficient management, no salaries and the only expense being for field operations, the profits to the stockholders should be much larger than in other companies.

In addition to our proven acreage we have ten acres in Tillman County, Okla., just across Red river from the Texas Chief well. This territory is having a number of deep tests put down now, and it is the opinion of the best oil men in Texas that this territory will soon be proven as rich in oil as the Texas field.

Then we have sixty (60) acres in Montague County, Texas, where deep tests are also being made. So you see none of our holdings can be considered EXTREME WILD-CATS.

It is our policy to develop a company of great earning power for our stockholders.
